

Grade 5 Unit 9

Question 1 is an open-response question.

- BE SURE TO ANSWER AND LABEL ALL PARTS OF THE QUESTION.
- Show all your work (diagrams, pictures, tables or computations) in your Student Answer Booklet.
- If you did work in your head, explain it in writing.

There are 375 students at a school in Waltham. They need to be divided so there are 9 in each group.

- A. Using the paper and pencil method, write how many students would be in each group. Show your work or explain how you got your answer.
- B. Is there a remainder? If so explain why you would write it as a regular remainder or as a decimal.
- C. Check your work by using multiplication. Show your work or explain how you got your answer.
